

Yr 2 Maths Wk commencing 18th May 2020

This week's focus is on multiplication

Each day try and get your child to practise some times tables (2, 5, 10, 3's and more if they are ready) Hit the button is a good game for them to play for some extra practise.

Lesson 1/2: multiplication – repeated addition, using 'x' and arrays

This session will remind children what the 'x' sign means – it is the same as repeated addition.

Lesson 3/4: 2 and 5 times tables

The lesson starts of with some pictorial examples and moves on to written multiplication sentences.

Please see the mastery multiplication challenges if you want some extra challenges for your child.
