Easter Arithmetic 2026

Year 5: You should be attempting all of these.

Year 5 - You should now be having a go at all the orange ones - if stuck, come and see me.

(it won't be long before you too can easily tackle these !)

Those year 5s who feel confident, can push on and attempt any purple you think you can attempt.

We should be trying at least the first step of the percentage ones - e.g. find 1% first (a hundredth - two jumps)

To give you an idea of time - year 6s can mostly do everything in about 30 minutes now. This is your aspiration.

Year 6 - the whole lot in 30 minutes is your target now.

Finish them all, but mark where you got to in 30 minutes.

Try your best and see me after the holidays IF YOU HAVE ANY PROBLEMS - We can fix anything together!
